DETAILED ACTION

Claim Rejections - 35 USC § 102

- 1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
 - A person shall be entitled to a patent unless -
 - (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Ofir et al (Ofir hereinafter, US PAT: 7,219,149).

Re claims 1, 2-4. Ofir discloses a method of handling a financial transaction in a transaction switch, the method comprising the steps of: receiving a primary transaction request from an initiator (see col.3 lines 37-41); identifying a host from a routing table for receiving the primary transaction request based on details provided in the primary transaction request (see fig.4 element 410, also see fig.5 element 510); transmitting the primary transaction request to the identified host (i.e., the host receives the card authorization request, see col.30 lines 15-25); receiving a response from the identified host (i.e., the host responds and the response is returned to the service node, see col.30 lines 18-22, also see fig.4 element 412), determining a need for transmitting the primary transaction request to another host; and interpreting the response received and transmitting a final outcome back to the initiator (see col.30 lines 25-45) (see col.29 line 20-col.30 line 60, see the abstract and the summary of the invention).

Page 3

Re claims 5, 6-9. Ofir discloses a method of handling a composite financial transaction in a transaction switch, the steps comprising: receiving a primary transaction request from an initiator (see col.3 lines 37-41); identifying the transaction as a composite transaction wherein the composite transaction comprises a transaction type and a payment type (see col. 30 lines 10-15, see fig.4 element 410, also see fig.5 element 510); preparing a plurality of transaction packets for transmission to a plurality of hosts based on the transaction type and the payment type (see col. 30 lines 10-15); receiving a plurality of responses from the plurality of hosts (i.e., the host responds and the response is returned to the service node, see col.30 lines 18-22, also see fig.4 element 412), and interpreting the plurality of responses and transmitting a final outcome to the initiator (see col.30 lines 20-25) (see col.30 lines 25-45, see col.29 line 20-col.30 line 60, see the abstract and the summary of the invention).

Re claims 10, 11-12. Ofir further discloses a transaction switch comprising: means for processing a transaction request (see fig.1 –fig.4); means for identifying the transaction as multi-host or composite or both (see col.30 lines 1-15, also see col.29 lines 55-65); means for identifying a first host for processing the transaction (see col.29 lines 62-66); and means for interpreting a response from the host after processing the transaction and determining a need for further processing (see col.30 lines 20-25) (see col.30 lines 25-45, see col.29 line 20-col.30 line 60, see the abstract and the summary of the invention).

Re claims 13, 14-17. Ofir discloses a financial transaction handling system comprising:

Art Unit: 3692

an initiator for initiating a primary transaction request (see fig. 12b element 1289); a transaction switch in communication with the initiator (see fig. 1 element 24); and at least one host in communication with the transaction switch for processing the transaction request (see fig.4 element 404 and fig.5 element 504); wherein the transaction switch comprises: means for processing the primary transaction request (see fig.3-fig.5, also see col.3 lines 35-60); means for identifying the primary transaction request as multi-host or composite or both type of request (see col.30 lines 1-15, also see col.29 lines 55-65); means for identifying the at least one host for sending the primary transaction request thereto (see col.29 lines 62-66, also see col.30 lines 8-20, also see fig.5 element 510); and means for interpreting a response from the at least one host and determining a need for further processing (see col.30 lines 20-25) (see col.30 lines 25-45, see col.29 line 20-col.30 line 60, see the abstract and the summary of the invention).

Re claim 18. Ofir further discloses a program storage medium readable by a computer, tangibly embodying a program of instructions executable by the computer to perform method steps for handling a financial transaction in a transaction switch (see the abstract and the summary of the invention), the method steps comprising the steps of: receiving a primary transaction request from an initiator (see col.3 lines 37-41); identifying a host from a routing table for receiving the primary transaction request based on details provided in the primary transaction request (see fig.4 element 410, also see fig.5 element 510); transmitting the primary transaction request to the identified host (i.e., the host receives the card authorization request, see col.30 lines 15-25);

Art Unit: 3692

receiving a response from the identified host (i.e., the host responds and the response is returned to the service node, see col.30 lines 18-22, also see fig.4 element 412), determining a need for transmitting the primary transaction request to another host; and interpreting the response received and transmitting a final outcome back to the initiator (see col.30 lines 25-45) (see col.29 line 20-col.30 line 60, see the abstract and the summary of the invention).

Conclusion

A prior art of record, Pittenger et al (US PAT: 5678010), cited but not relied upon is found pertinent to the present application in the following ways: Pittenger discloses a system for processing credit card transactions. Transaction data to be processed is sent by point of sale terminal to a terminal node connected to a sophisticated communications network. The terminal node uses routing data contained in the transaction data to establish a connection to a verification service host. The connection is established while the terminal node concurrently continues to receive and then validate the transaction data. Overall transaction-processing time is reduced because the network connection needed for verification of the transaction data is established while, rather than after, transaction data is received and validated.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to OJO O. OYEBISI whose telephone number is (571) 272-8298. The examiner can normally be reached on 8:30A.M-5:30P.M.

Art Unit: 3692

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, kAMBIZ ABDI can be reached on (571)272-6702. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
